Eric -

Dana and I have discussed the issue. I think we can draw sufficient conclusions from whole-body samples, and I agree with Dana that we don't need additional sturgeon fillets for the HHRA. We have fillet data from the EPA/DHS sampling in the Willamette, and whole-body and fillet data from the CRITFC study.

- Mike

Mike, Dana is out of the office until next Monday. Any opinion about the need for additional sturgeon fillets to support the HHRA - i.e., from larger fish? Dana does not think it is necessary. What do you think?

Eric
